

1% BETTER WORK + 1% MORE WORK = £380 PER YEAR

- I'll learn all the hot design trends we should be using at work: anticipatory & optimistic design, chatbots, VR, wearables, data science, and who knows what else
 - I'll learn how to integrate design, code, and testing to a lean workflow with dramatic wins on time to delivery and team satisfaction
 - I'll get practical hands-on tutorials in new skills from experience maps to card sorting
- The UX Conference will help me design better and quicker. At least 1% more.

A happy designer is a more productive designer and this conference will bring me joy:

- I'll meet other creatives, get inspired and reinvigorate my passion for design
- I'll feel confident I know what's coming up next in design and how to stay on top of my game
- I'll appreciate your trust to invest in my growth and I will return the love. At least 1% more.

That's 2% of the London Living Wage Salary (£19k), and we hope all UX designers are rewarded better.
